Your Daily Multivitamin

Description

Dosage

1 capsule per day to be taken with a glass of water, with a meal.

Recommendations

It is recommended to not to exceed the recommended daily dose. A nutritional supplement is not a substitute for a varied and balanced diet and a healthy lifestyle. A nutritional supplement is not a medicine. Keep out of reach of children. Inform your doctor and/or pharmacist in case of simultaneous use of medication. Pregnant or breastfeeding women, ask your therapist for advice. Keep away from light and humidity.

Filling your deficiencies with MaxiVits: A Complete Micronutritional Solution

What is MaxiVits? MaxiVits is an innovative formula, specially designed to meet the micronutrient needs of every individual, whether male or female. By carefully combining a synergy of essential vitamins and minerals for our well-being with a meticulous selection of natural carotenoids and flavonoids, MaxiVits provides the essential micronutrients needed for proper functioning.

Why does our body need this mix of vitamins? Marked by stress, pollution, and dietary imbalances, it's common for our body to exhibit nutritional deficits or deficiencies. These deficits can affect our energy, immunity, and overall health. MaxiVits is designed to address these gaps, offering a vitality complex enriched with 21 targeted actives that contribute to various essential functions of our body. With its rich and varied composition, MaxiVits leverages vitamins B1, B2, and B3 to contribute to cellular energy production, while zinc and vitamin C contribute, among other things, to the proper functioning of the immune system.

What sets MaxiVits apart is its ability to provide a perfect synergy between its components. Each vitamin, mineral, carotenoid, and flavonoid has been selected for their specific role and contribution to the physiological balance of the body. This synergy not only ensures better absorption and effectiveness of nutrients but also contributes to a comprehensive action on health, covering essential micronutritional needs and helping to reduce fatigue with vitamins B2, B3, B5, B6, B9, B12, C contributing to the reduction of tiredness; present in MaxiVits.

Maximizing Absorption and Effectiveness with MaxiVits: Innovation in Bioavailability

MaxiVits stands out not only for its rich composition in micronutrients but also for its innovative approach to bioavailability and cellular assimilation.

- Pullulan capsule: Thanks to the use of the galenic form in pullulan, a natural polysaccharide obtained through fermentation, MaxiVits ensures optimal nutrient release in your body. This vegetable capsule is specifically designed to dissolve only in the intestine, where nutrient absorption is maximal, thus guaranteeing that each component of MaxiVits is fully utilized by your body.

- **The Importance of the Natural Excipient:** Rice starch, chosen as the excipient in MaxiVits, plays a crucial role in the purity and effectiveness of the formula. Unlike synthetic excipients, rice starch is gentle on the digestive system and promotes a harmonious assimilation of vitamins and minerals.
- **The Key Role of Quatrefolic®:** At the heart of the MaxiVits formula is Quatrefolic®, a patented form of folate (vitamin B9) that represents the latest generation of folate supplements. This advanced version of folate is directly active and available to the body, without the need for conversion by the liver, as is the case with synthetic forms of folic acid. Quatrefolic® thus ensures maximum absorption and increased effectiveness, helping to reduce fatigue and support the normal metabolism of homocysteine, an amino acid associated with cardiovascular health.
- **Synergy of Vitamins and Minerals:** The strength of MaxiVits also lies in the carefully studied synergy of its vitamins and minerals. This combination amplifies the actions of each micronutrient, promoting a comprehensive action. For example, vitamin C improves the absorption of iron from other dietary sources, and the B vitamins work together to aid energy production and reduce tiredness.
- **Strategic Choice of Micronutrients:** The Lepivits® dietary supplements exclusively use the natural form of vitamin E, recognized for its bioavailability compared to its synthetic counterpart. This preference ensures better recognition and use by the body, contributing to antioxidant protection by reducing oxidative stress and cellular damage. The selection of zinc in the form of citrate is also determined by its high bioavailability, ensuring good absorption and digestive tolerance. Zinc is essential for strengthening the immune system by playing a role in the process of cell specialization. Unlike sodium selenate and sodium selenite, MaxiVits incorporates Selenium on yeast, a natural form of selenium preferred for its better absorption and retention in the body. The included natural iodine is selected for its purity and effectiveness of assimilation, contributing to the normal production of thyroid hormones and normal thyroid function. The coenzymated forms of the B vitamins chosen are directly usable by the body, eliminating the need for enzymatic conversion. This feature allows for an immediate and effective action.

Composition

Nutritional information

NUTRITIONAL INFORMATION	1 CAPSULE	AR%*
-------------------------	-----------	------

Beta-carotene	5,4mg	-
either vitamin A	(900?g)	112
Vitamin B1 (thiamine hydrochloride)	1,65mg	150
Vitamin B2 (riboflavin 5'-phosphate Na)	1,4mg	100
Vitamin B3 (nicotinamide)	48mg	300
Vitamin B5 (Pantothenate D-Calcium)	18mg	300
Vitamin B6 (Pyridoxal-5-phosphate)	6mg	428
Vitamin B8 (D-Biotin)	450?g	900
Vitamin B9 (Quatrefolic®)	300?g	150
Vitamin B12 (methylcobalamin)	2,5?g	100
Vitamin C (ascorbic acid)	180mg	225
Vitamin D	25?g	500
Vitamin E	30mg	250
Vitamin K	75?g	100
Iodine	225?g	150
Selenium	105?g	190
Zinc	20mg	200
N-acetyl-L-cysteine	100mg	-
Hesperidin	50mg	-
Lycopene	5mg	-
Lutein	2,5mg	-
Haematococcus pluvialis	40mg	-
of which astaxanthin	2mg	-

**Reference Intake (directive 2008/100/CE modifiant -> arrêté 08.01.1992)*

Composition

Vitamin C, capsule shell: pullulan, N-Acetyl-L-Cysteine, zinc citrate, Hesperidin, Lycopene, Selenium-enriched yeast, Vitamin B3, Haematococcus pluvialis powder (unicellular algae) dosed in astaxanthin, Vitamin E (D-alpha tocopherol acid succinate), Beta-carotene, dry extract of Tagetes (Tagetes erecta - flower) titrated in Zeaxanthin, rice starch, Vitamin B5, Vitamin K2 (Menaquinone), Lutein, Vitamin D3 (cholecalciferol), Vitamin B6 (Pyridoxal 5'-phosphate), Vitamin B1, Vitamin B2, Vitamin K1 (phylloquinone), (6S)-5-methyltetrahydrofolic acid as glucosamine salt, Vitamin B8, Potassium iodide, Vitamin B12.

Form: Vegetarian capsule

Free from: Casein, Gluten, Lactose, Preservatives, Synthetic dyes, Synthetic flavors

Raw Material: Vitamin B2, Vitamin B3, Vitamin B5, Vitamin B6, Vitamin B9, Vitamin B12, Vitamin C
