Optimised Absorption of Vitamins D and K

Description

Dosage

1 ml to 2 times daily (see pipette). Can be taken directly taken, or mixed with a glass of water or juice. Shake well before use. Do not exceed the dose of 1 ml per day for children under 11 years of age should not be exceeded.

Recommendations

Food supplement, cannot replace a varied and balanced diet. To be taken as part of a healthy lifestyle. Please inform your doctor if you are taking taking medicines. Not suitable for people taking coumarin anticoagulants use. Children under 11 years should not take more than 1 ml per day ingest.

Discover the Unique Benefits of D3+K2

The dietary supplement D3+K2 Liposomal introduces a thoughtful approach to supplementation. This formula has been carefully developed to provide a targeted source of plant-based vitamins D and K. With an emphasis on improved absorption by the body, our goal is to ensure that you get the most out of these essential micronutrients.

Vitamins D and K are not just active substances; they are fundamental to several vital functions of our body. Vitamin D, often called the "sunshine vitamin," is essential for maintaining normal bone health and the normal functioning of the immune system. It also plays a role in the cell division process and contributes to the maintenance of normal muscle function and teeth. On the other hand, vitamin K is important for normal blood clotting and complements the action of vitamin D in maintaining normal bone health.

Advancements in Nutrition: The Liposomal Revolution for Your Health

- Explaining Liposomal Technology: Liposomes are tiny vesicles made up of lipid layers, similar to the cell membrane of our own cells. By encapsulating vitamins D3 and K2 in these fat bubbles, we create a protective barrier that shields them from acids and digestive enzymes. This protection is crucial as it allows the vitamins to travel intact through the digestive system and reach the target cells where they are most needed.
- Tripling Bioavailability: Thanks to this encapsulation method, the bioavailability of vitamins D3 and K2 is tripled.

Composition

Nutritional information

NUTRITIONAL INFORMATION		1ml (see pipette)	AR% *
-------------------------	--	-------------------	-------

Vitamin K (Menachinon-7) 98.5% MCT oil	45?g	60
Vitamin D (Cholecalciferol) - 0.2% D-alpha Tocopherol als	25?g	500
Antioxidationsmittel 97.3% MCT oil.		

* Recommended Daily Allowance (Directive 2008/100/EC amending -> Decree 08.01.1992)

Composition

Purified water; sweetener: xylitol E967; emulsifier: lecithin (sunflower) E322; humectant: glycerol E422; acidity regulator: citric acid E330; vitamin K2 (as menaquinone); acidity regulator: E524 sodium hydroxide; apricot flavouring; vegan vitamin D3 oil (as cholecalciferol); preservative: E202 potassium sorbate; antioxidant: E307 alpha-tocopherol.

Categorie:	Immunity
Characteristic:	Vegan
Form:	Liquid
Free from:	Casein, Gluten, Lactose
Raw Material:	Vitamin D, Vitamin K2
